

# Writing and Developing a Successful Book

Tim Pitts email; [tim.pitts@elsevier.com](mailto:tim.pitts@elsevier.com)

Senior Acquisitions Editor, Electronic Engineering,  
Computer Vision and Medical Imaging.

September 2017

# Agenda

- Give examples of different types of books that have been successful
- Discussion of the types of books that have had an impact on you
- To show what kind of book you could write, edit or contribute as a chapter author
- To explain the publishing process
- What makes a good book proposal
- Tips for approaching a Publisher
- What Elsevier can do to help Polish authors publish in English

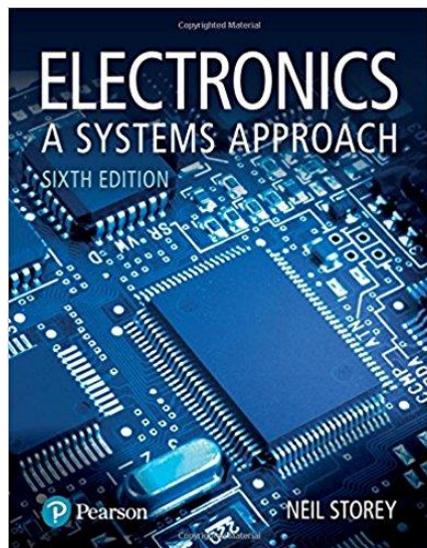

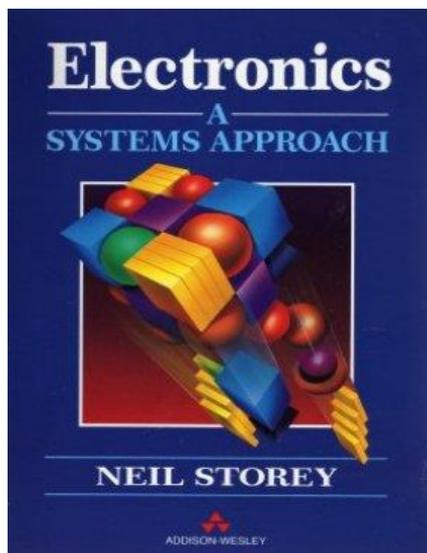

# What am I and what do I do?

- A Senior Acquisitions Editor – sometimes called a Commissioning Editor
- I research technology and market developments in specific fields
- Identify book publishing opportunities
- Commission authors to write or edit books on specific topics
- My fields of publishing are electronic engineering, computer vision, medical imaging
- I have worked in Publishing for 34 years, both as a sales representative and as an Acquisitions editor
- I don't have a background in Engineering – a philosophy graduate a longtime ago!

# What constitutes Success?

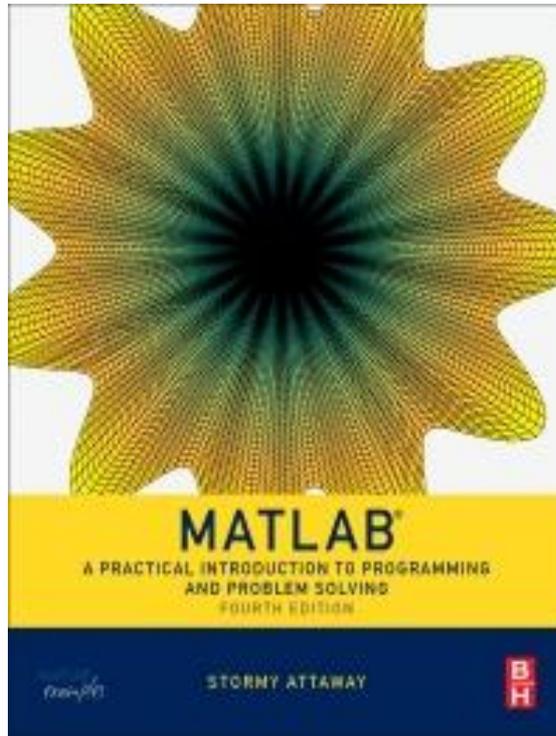

- Sales – number of copies sold and revenue from e-book sales
- Usage – chapter and whole book downloads from library patrons (we can quantify through Science Direct)
- Reader impact – beneficial, readers are positive and enthusiastic about the book (Amazon reviews, Social Media)
- Well regarded by peers
- Citations (Plum Analytics Metrics)
- Author's personal satisfaction at having a physical book (an E-book) that embodies his/her work
- Possible promotion

# Impact of a book: Storey: Electronics, 1992, 6<sup>th</sup> edition 2017

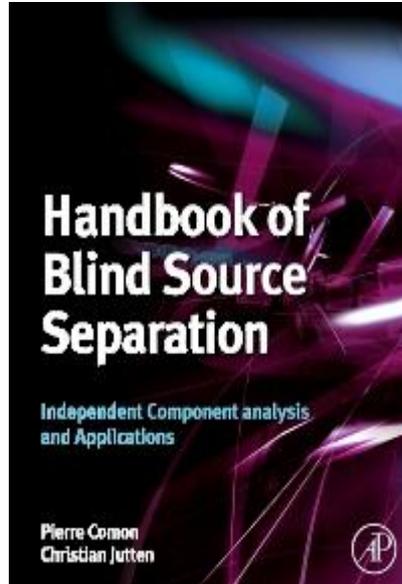

- Influenced a future author when as an undergraduate
- Distinct 'systems approach' – motivational
- Author had a talent for explaining the concepts
- Only proposing to cover analog electronics
- Books that were used on courses covered analog and digital electronics
- Advised the author to cover Analog and Digital – book adopted as a course text!

# Attaway MATLAB: A Practical Introduction to Programming and Problem Solving, 4<sup>th</sup> edition

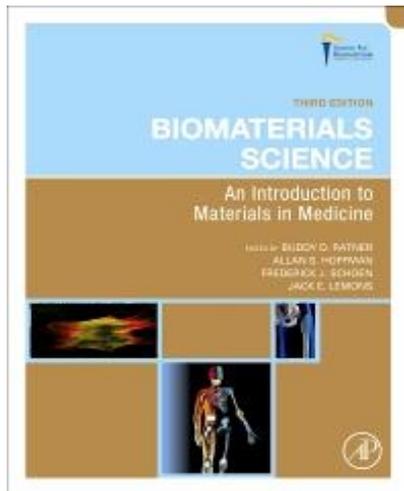

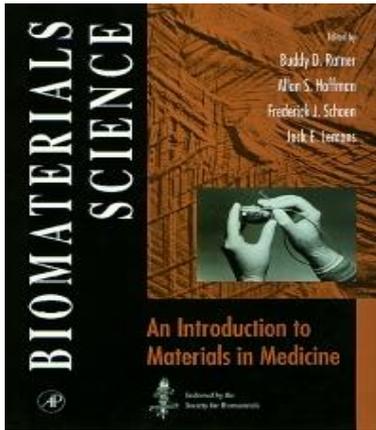

- Market leader
- Lots of books published on MATLAB when we decided to publish
- Distinct approach – combined teaching MATLAB programming with teaching MATLAB functions
- Good features
- ‘This is an actual programming guide with tips, hints, and corrections of common errors beginning programmers often make, with end of chapter problems that cover concepts discussed in the chapters to teach the reader MATLAB by doing’ **Amazon customer**

# Comon and Jutten: Handbook of Blind Source Separation, 2008

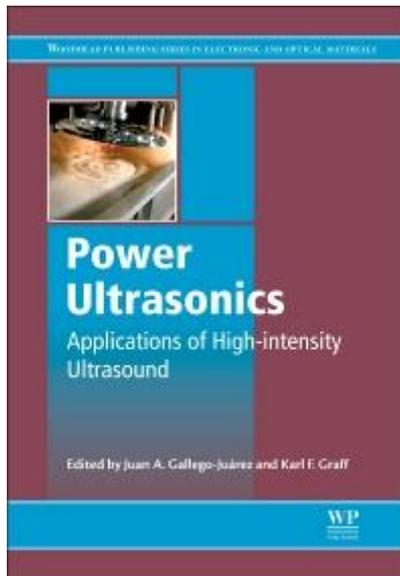

- Originally published in French
- Editors translated into English
- Expanded coverage by inviting international experts to write chapters – broader than French version
- Editors developed key methods of ICA
- Important methodology with wide applicability
- Strong electronic sales from Science Direct
- Well above average chapter downloads – strong usage.
- Room for a new edition

# Ratner: Biomaterials Science 1<sup>st</sup> edition 1997, third edition 2012

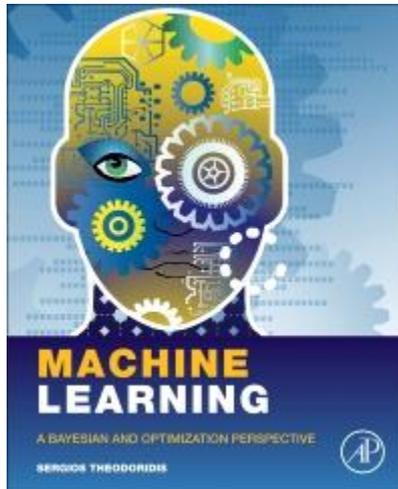

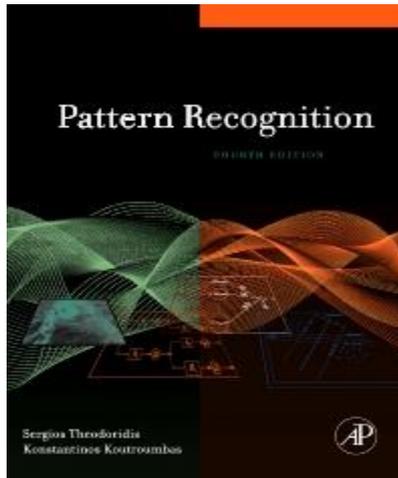

- Sold in the many 10s of 1000s
- 3<sup>rd</sup> edition hundreds of 1000s chapter down loads
- Electronic Revenue of the third edition 3x that of the 2<sup>nd</sup> edition.
- Broad audience
- Adopted on courses as well as bought by researchers
- Covers the entire spectrum of biomaterials and their use in medicine

# Juan A Gallego-Juárez: Power Ultrasonics, 2014, 1166pp

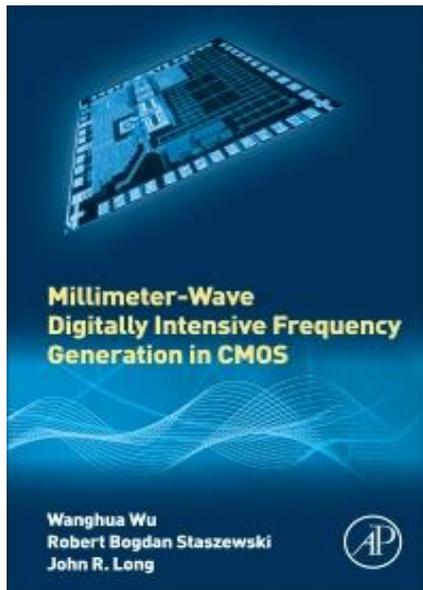

- An edited book on a specific topic
- High electronic sales through Science Direct
- Strong usage
- Only book focused on power ultrasonics and its applications
- In-depth coverage of fundamentals (10 chapters) combined with wide breadth of applications
- Edited by leading experts in field with academia and industry experience

# Theodoridis: Pattern Recognition, 4<sup>th</sup> edition, 2008

- A textbook written for graduate students and researchers
- Competing against a very well established competitor – seen as the ‘bible’ in the field
- 4<sup>th</sup> edition increased sales considerably
- Developed explanations of the concepts, used more examples and diagrams
- Brought in MATLAB code
- Achieved more adoptions on graduate courses
- In 2014 the author wrote a textbook on Machine Learning – also successful.

# Wu, Staszewski, Long: Millimeter-Wave Digitally Intensive Frequency Generation in CMOS

- Based on Wu's PhD thesis
- Broad enough in subject area for a wide interest
- Added in new content
- Staszewski was Wu's PhD advisor

## **Wearable Electronics – an example of a Post Doc editing a book, publish 2019**

- **Onur Parlak - Postdoctoral Research Fellow, Stanford University/USA**
- **Teamed up with leaders in the field: Professor Salleo and Professor Turner**
- **Professor Salleo was his Post Doc mentor**
- **Succeeded in inviting leading researchers to contribute as chapter authors with this Editor team.**

## Edited Book

- Editor (s) writes the book proposal
- Invites the chapter authors
- Project manages schedule
- Reviews draft chapters and submits feedback to the authors

### Development Issues:

- Integrated with a connecting theme – not just a collection of disparate chapters
- Each author writes to the specification
- Avoid overlap in coverage
- Ensure quality standards throughout

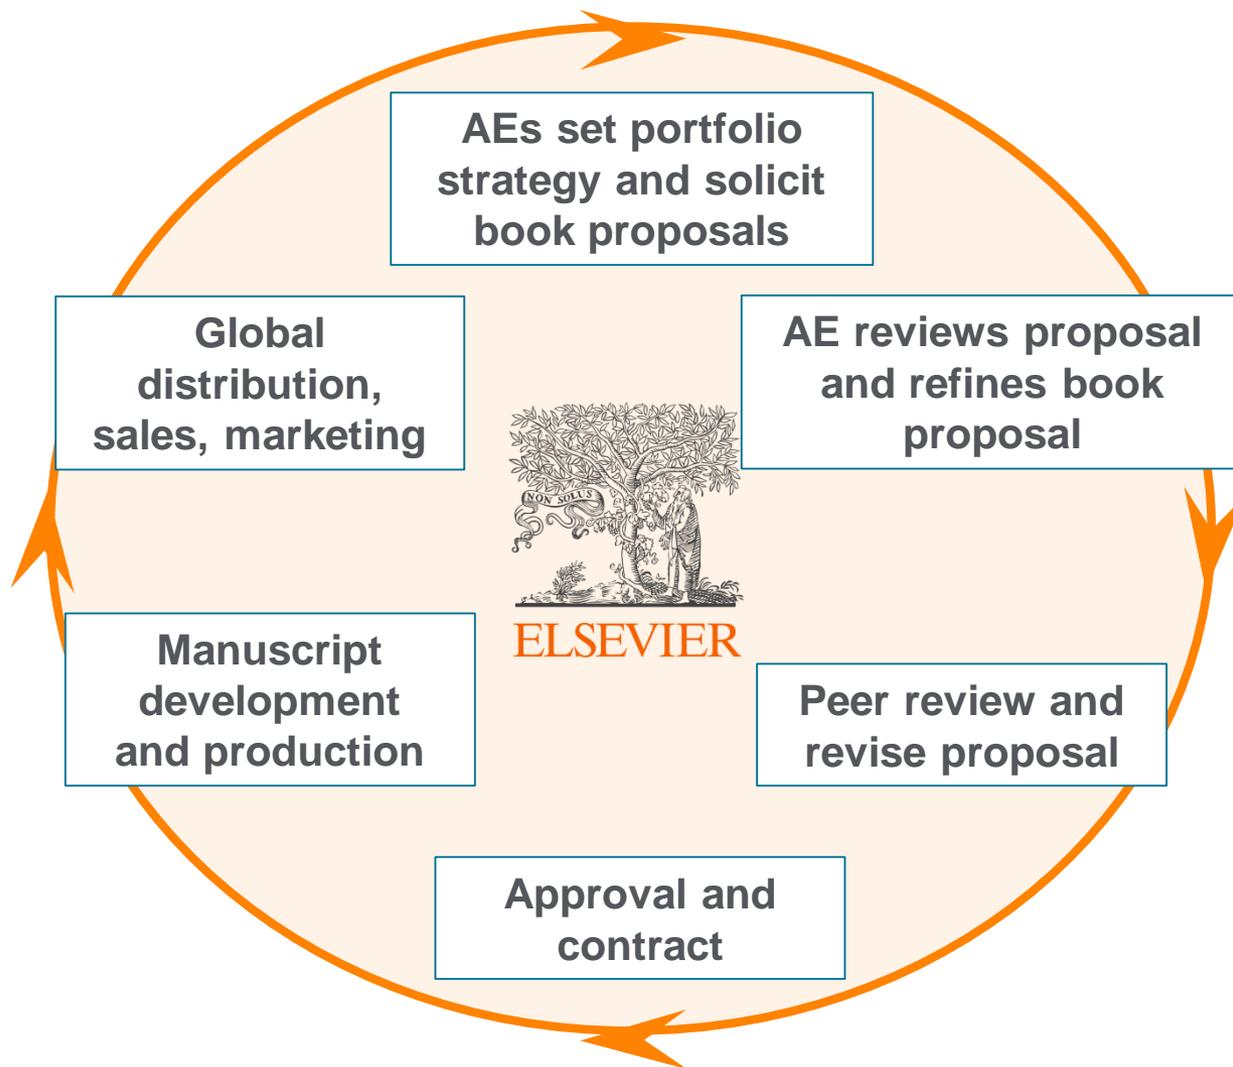

## Types of book you can publish - summary

- A chapter in a handbook or reference work
- You could be an editor for a reference work, inviting authors to write chapters
- Author your own monograph on a specific topic
- Write a textbook
- Develop your PhD thesis into a book
- Translate (and expand) your book in Polish

Books are published in print and as an electronic copy

Our E-books are sold as a subject package to libraries and content aggregators

# Book Publishing Cycle

# Proposal Process

**Proposal  
Submitted  
to Editor**

**Proposal  
reviewed  
by external  
experts**

**Feedback  
to author;  
proposal  
revised to  
incorporate  
feedback**

**Book  
formally  
proposed  
at  
Publisher**

**Approval >  
Contract  
Issued**

# Completing a Book Proposal – Key components

- Working Title
- Target Audience – be specific and focused
- Rationale – how does my book meet a need?
- Description of the approach - 1-2 paragraphs
- How does my book benefit my audience?
- Competition – how is my book new and different from other published books in the area?
- Table of Contents – chapters listed
- Writing schedule – how long will it take to write?
- Number of pages
- Curriculum vitae

## Will Your Book Proposal be Accepted?

- ✓ Complete Proposal Form
- ✓ Demonstrated Market Need
- ✓ Clear Audience
- ✓ Strong Reviews
- ✓ Revised proposal addresses reviewer feedback
  
- ✗ Incomplete Proposal Form
- ✗ Confusion over market/audience
- ✗ Offers nothing new to field
- ✗ Inadequate responses to reviewer feedback

## Do you pay us or we pay you?

We pay You!

- A royalty on the print sale of the book based on the net price
- A royalty on e-book sales

## Production

- Production Manager oversees production process
  - Copyediting
  - Typesetting
  - Proofreading
  - Indexing
  - Printing

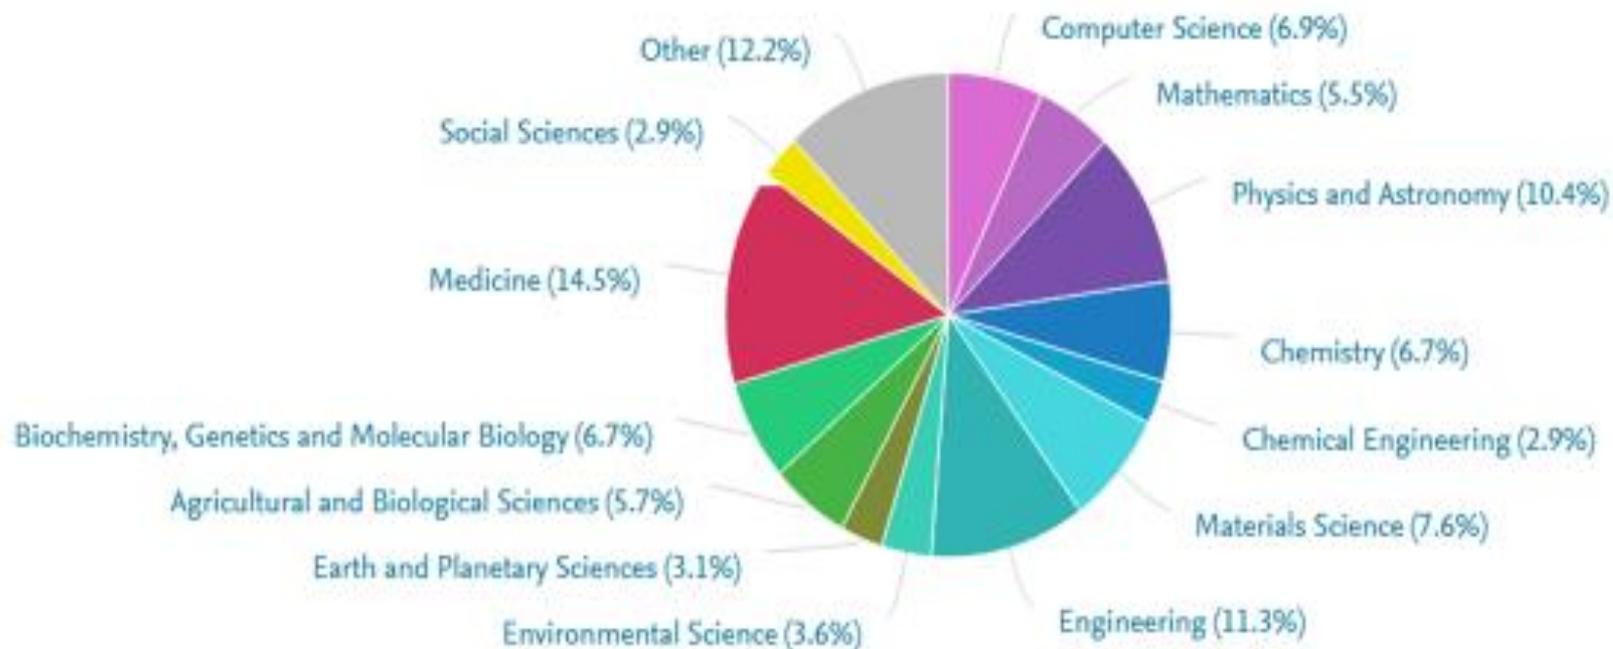

## Tips for Approaching a Publisher

- Establish most suitable Publisher (s)
  - Does your book fit their subject areas?
  - Do they publish the types of books that you plan to write/edit
- Informal contact with the Acquisitions Editor
  - what are you proposing - be brief
  - demonstrate the fit with their list/portfolio
  - ask to discuss its potential before formal submission
- Publishers have their own official proposal forms but Editors also work to their own preferred format

## Polish content strengths align with Elsevier Science & Technology Books' publishing strategy and areas of interest

### Poland - overall research performance

## Helping Polish Authors Publish in English

- Elsevier is committed to publishing world-class books by authors in countries of high research expertise
- Poland has strength in many subject areas of interest to Elsevier, including Physics, Mathematics, Chemistry, Chemical Engineering, Materials Science, Engineering
- Elsevier can help to bring your institution's research work to a global audience, digitally and in print

## Engineering Subject Areas of Interest

- Biomedical Engineering
- Telecom/comms/imaging
- Materials science and engineering (including nano, plastics/polymer, materials chemistry, electronic materials)
- Advanced manufacturing (eg 3D printing)
- Computational methods
- Energy
- Process engineering
- Civil, mechanical, environmental

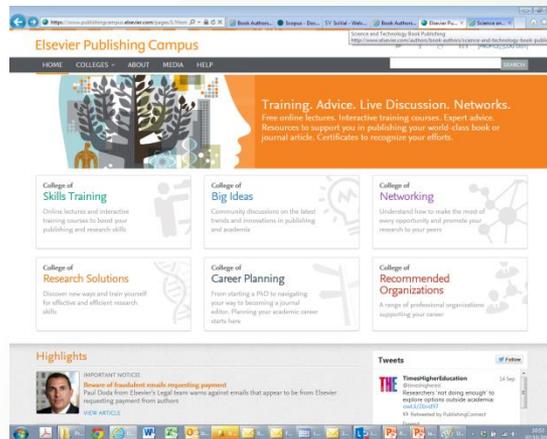

# Developing books by your institution's authors

## How can Elsevier assist?

### Online resources at Elsevier Publishing Campus

Webinars and training on developing proposals, ethics, rights and copyright, and more

[www.publishingcampus.elsevier.com](http://www.publishingcampus.elsevier.com)

*Need help?*

### Personal, targeted guidance on project development

Contact the Editorial team to discuss book publishing ideas. Receive guidance on developing proposals and the academic publishing process

### E-book partnership

Elsevier wants to develop programs to support institutional publishing, including publishing partnerships. Our Editorial team will be pleased to discuss opportunities for new books series with your institution.

# Links and Contacts

## **Elsevier Publishing Campus:**

Training, advice, resources and lectures to get you published
